

CompTIA Data+

Certification & Training

Course description

The CompTIA Data+ certification is for professionals who are in charge of making data-driven decisions in their businesses. This equates to 18–24 months of practical experience working in business intelligence or data analyst capacity. CompTIA Data+ certification holders have the knowledge and abilities to translate business requirements into data-driven decisions by

- Data mining
- Data manipulation
- Using fundamental statistical procedures
- Throughout the data lifecycle, analyzing complicated datasets while adhering to governance and quality criteria

Even career paths other than data-related careers can benefit from data analytics processes and knowledge. When they are able to use and evaluate data correctly, professionals such as marketing specialists, financial analysts, human resource analysts, or clinical health care analysts can maximize performance and make informed decisions. So, if you are into these professions, do attend this CompTIA Data+ certification course provided by InfosecTrain.
