📇 Dedicated session for Interview Prep

Course Overview

The Data Protection Officer course offered by InfosecTrain aims to bridge the gap between an organization &current processes and the requirements outlined in the General Data Protection Regulation (GDPR).

This includes reviewing and updating procedures, privacy policies, consent forms, data protection impact assessments, and working instructions to ensure compliance with GDPR regulations.

The Data Protection Officer training course from InfosecTrain allows you to develop the required skills, knowledge, and competence to efficiently execute and manage a compliant framework with the aim of safeguarding personal data. This will assist in associating organizations in the process of adopting the new regulation.
