# Course Description

## Overview

The RSA Archer training course offered by InfosecTrain introduces all the essential concepts and processes required to effectively design, configure, and manage the RSA Archer platform. The course incorporates interactive and hands-on sessions where you will learn how to navigate the RSA Archer system, create applications and dashboards, troubleshoot issues, and more. The training also includes real-world case scenarios and projects to enhance your skills and prepare you for the RSA Archer certification exam. By completing this training, you will gain a foundational knowledge of RSA Archer and be equipped with the skills necessary to use the platform for GRC-related tasks.
